

Dear FCC,

I love satellite radio. Please do not interfere in their free market attempts to bring me the highest possible quality product at the lowest price. I refer specifically to their ability to offer superior quality traffic and news channels for my local market. This is a service that is highly valuable to me and I am eagerly antcipating.

I repectfully urge you to reject the NAB's Petition 04-160. I pay for the service of satellite radio and the NAB should have no say in the content they provide me...

Best regards,

Brian Keever
